#web3.0

01

● The problem

Data protection

Protection of privacy

Transparency in data handling

● The problem

● The problem

How to make **everyone** benefit from the advantages of **web 3.0** ?

WHAT IF WE DON'T CHANGE ANYTHING ?!

For us, the democratization of web3.0 goes through its use, but must first keep the same user experience as the web of today.

dtransfert.com

...

01

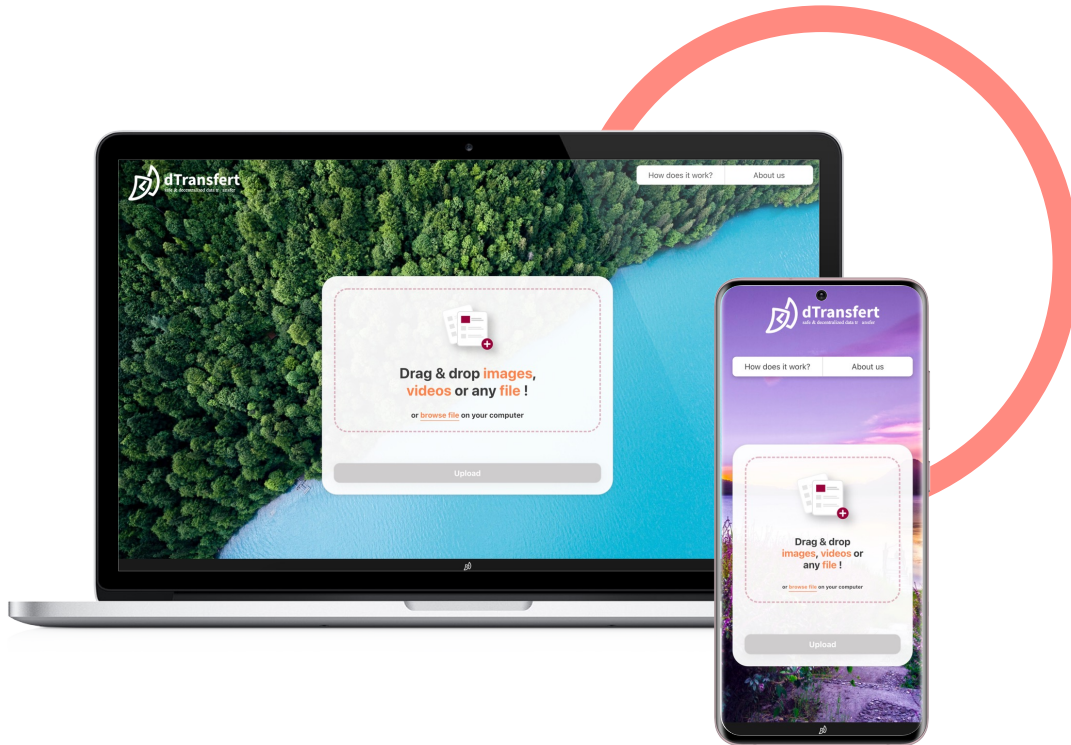

A very simple use with a strong accessibility and virality.

02

We encrypt everything from end to end, ensuring that your data is always secure.

03

All your data is stored encrypted on the decentralized IPFS network.

DEMO

Key numbers for a better understanding

Billion of euros of investment worldwide for the **protection of personal data**.

The **democratization** of **web 3.0** starts with the adaptation of the **most common tools** of the classic web.

WeTransfer at a valuation of over **700 million €**.

Nevertheless, and despite its use, it does not hide from being able to **freely access your data**.

The Next Steps

Send text directly from dtransfert.com

Optimization and speed gain

Creation of a user space in IPFS.

Creation of a premium package for uploading files larger than 5Go.

Creation of a real tool suite.
